

Azure: An Online Editing Platform

README

Step 1: Open up the server

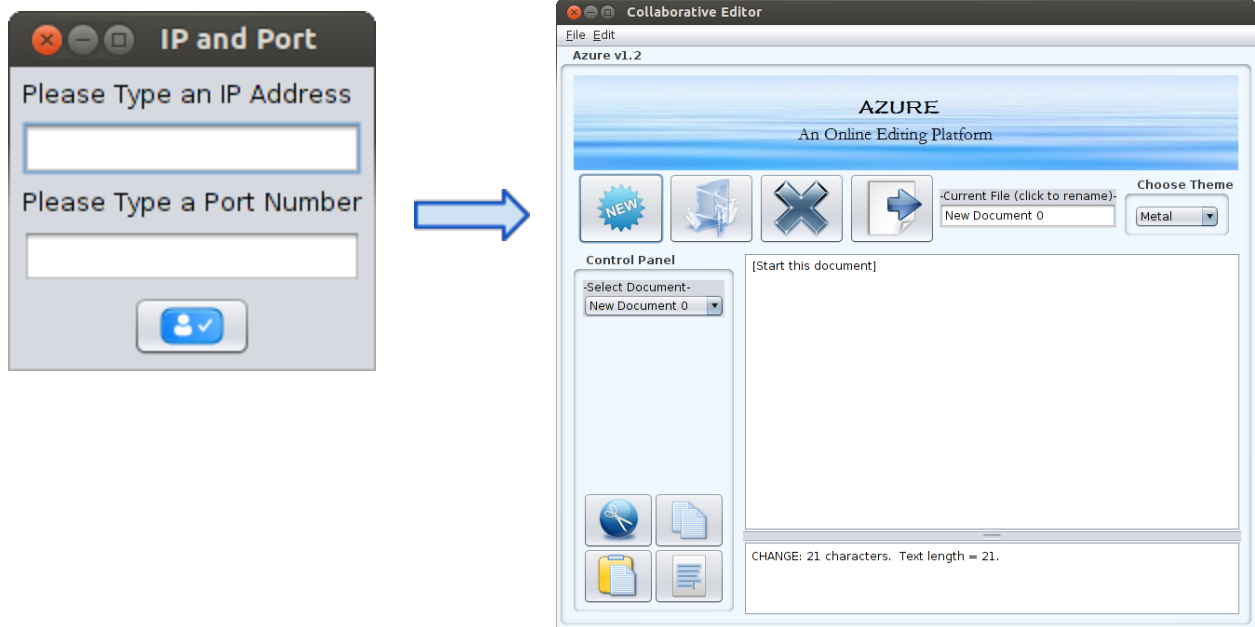

Run [src/server/startServer.java](#), specify a port number, and hit enter.

Step 2: Connect client to server

Run [src/gui/startGUI.java](#).

A dialog window will pop up, asking for port and IP information. Please enter the relevant information to launch the main user interface.

Notes

1. Run [src/gui/startGUI.java](#) multiple times to open multiple clients.
2. Currently supporting the following operating systems: Windows, Ubuntu, and MacOX.
